				Tank Style: Composite	

Utility Service Co., Inc. agrees to provide all labor, equipment, and materials needed to complete the following:

1. A date shall be coordinated by both parties for the Owner to drain the tank.
2. The interior floor and lower walls of the tank will be cleaned using a pressure washer to remove all mud, silt, and foreign sediment. The tank will not be rigged to pressure wash the upper walls, and roof unless specified by this agreement. This cleaning will not completely remove all staining or any Bio-film that may be present.
3. The tank will be inspected to assess the sanitary, safety, structural, security, and coatings conditions.
4. Exterior and interior paint samples will be taken and the samples will be analyzed at a certified laboratory to determine the total lead and chromium content of the existing coatings. The laboratory test results will be included in the inspection report.
5. After all inspection work is completed, the tank will be disinfected in accordance with AWWA C652.
6. The tank will be sealed and made ready for service.
7. A comprehensive written report with color digital photographs will be submitted detailing the condition of the tank. A representative of Utility Service Co., Inc. will schedule a date with the Owner to present the report and findings.
8. This price does not include containment, testing, or off-site disposal of sediment or debris from the tank.
