

DESIGN CONTRACTS

1. Cliff Avenue and Willow Street Roundabout

- Overview: The existing intersection will be reconstructed and expanded with a multi-lane roundabout.
- Status: Right of way/easement acquisition and preparation for private utility relocation.
- Construction: 2023 and 2024
- Contact: Chad Huwe | chuwe@stockwellengineers.com

2. Westside Sanitary Sewer Extension – Phase 1

- Overview: The installation of this trunk sewer line will support future growth on the west side of Harrisburg and eliminate three lift stations. The project begins at the Main Lift Station and ends north of Freedom Elementary.
- Status: The Department of Agriculture and Natural Resources are reviewing the construction documents. An August bid opening is anticipated.
- Construction: 2022 and 2023
- Contact: Chad Huwe | chuwe@stockwellengineers.com

3. Prospect Street (272nd Street) Improvements: Minnesota Avenue to Cliff Avenue

- Overview: The roadway surfacing will be improved from gravel to asphalt pavement.
- Status: Design is underway.
- Construction: Fall 2022 – Spring 2023.
- Contact: Mitch Mergen | mmergen@stockwellengineers.com

4. 2022 Concrete Repairs – Various Locations

- Overview: Concrete repairs (curb & gutter, valley gutter, fillets) will be completed prior to the slurry seal project.
- Status: Contract has been awarded.
- Construction: July/August 2022.
- Contact: Chad Huwe | chuwe@stockwellengineers.com

5. 2022 Sidewalk Improvements – American Legion, south side of Willow Street, east of Railroad Avenue, and Water Reclamation Facility

- Overview: Sidewalk improvements at three locations.
- Status: Bid opening on July 13.
- Construction: August/September 2022.
- Contact: Chad Huwe | chuwe@stockwellengineers.com

6. Slurry Seal

- Overview: A slurry seal is a low-cost preventative maintenance treatment used to extend the life of a street in good condition and address minor defects. Various streets in the community will be sealed as part of the City's overall maintenance program.
- Status: Preconstruction meeting was held on May 31st.
- Construction: August 2022.
- Contact: Dexter Mahrt | dmahrt@stockwellengineers.com

7. Prospect Street: Faith Avenue east to the Railroad

- Overview: Prospect Street will be improved from a gravel road to an asphalt pavement section with curb and gutter.
- Status: Construction is 50% complete with an anticipated completion date of September.
- Construction: 2022.
- Contact: Mitch Mergen | mmergen@stockwellengineers.com

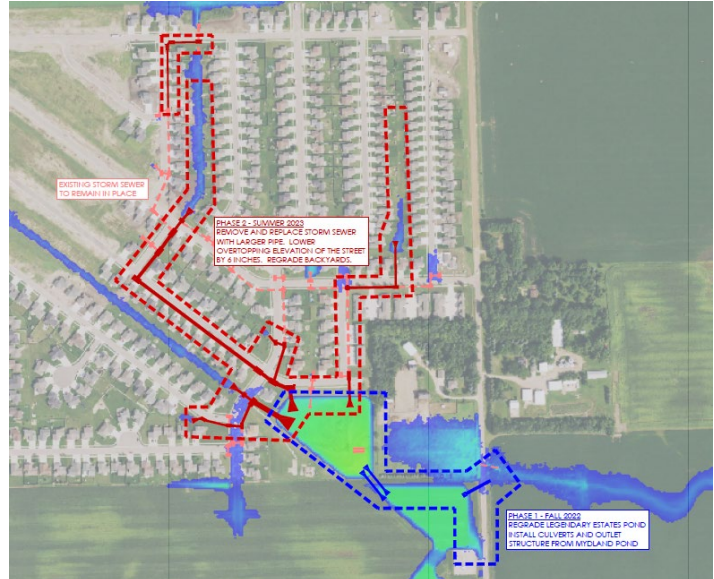

8. Water Reclamation Facility

- Overview: The facility is designed to treat 1 million gallons of wastewater per day, is expandable to 4 million gallons per day, and was put in service in September of 2021.
- Status: Warranty Period
- Contact: Aaron Moen | amoen@stockwellengineers.com

9. Legendary Estates Drainage Improvements (Phase 1)

- Overview: The Legendary Estates Pond will be regraded to add storage capacity, larger storm drainage pipes will be installed between the Legendary Estates Pond and the Mydland Estates Pond, and an outlet structure will be added to the Mydland Estates Pond. This is the first of two projects to improve the storm drainage in this area.
- Status: Bid opening is August 4, 2022.
- Construction: 2022 and 2023.
- Contact: Heidi Condon | hcondon@stockwellengineers.com

10. Legendary Estates Drainage Improvements (Phase 2)

- Overview: To reduce flooding in the area, existing streets will be lowered at overtopping locations and larger storm drainage pipes will be installed west and north of the Legendary Estates Pond. An alternate will be provided in Phase 2 to connect the storm drainage system to the property to the north.
- Status: Project is on hold until funding is available.
- Construction: Projected for 2025 or 2026.
- Contact: Heidi Condon | hcondon@stockwellengineers.com

11. Hugh Robinson Park - Playground Improvements

- Overview: New accessible playground, sensory panels, and swings with poured-in-place rubber surfacing.
- Status: Concrete pad and grading is completed. Delivery of playground equipment for installation is anticipated by the end of July.
- Construction: August 2022.
- Contact: David Locke | dlocke@stockwellengineers.com

12. Central Park Master Plan Update

- Overview: Update the Central Park Master Plan to incorporate public and user group feedback based on previous master plan and current ongoing improvement projects to the park.
- Status: Concept development based on public input received at Harrisburg Days on June 11. Project update will be presented to Park Board for input at July meeting.
- Construction: TBD.
- Contact: David Locke | dlocke@stockwellengineers.com
